

Nestlets are used as nesting materials for mice, rats, rabbits and other small animals. They are made of pulped virgin cotton fiber - clean, dust-free and autoclavable.

- Certified GLP Compliant
- Nestlets utilise the inherent instinct of rodents to shred and build nests, encouraging activity
- The nesting material is designed to retain warmth and is inert and non-ingestible
- Nestlets are soft and absorbent without being dessicative and are non-irritating even to newborn young
- An economical solution, offering considerable cost savings in labour, storage and disposal

- Certified GLP Compliant
- Cocoons satisfy animals' natural instincts to shred material to make nests
- The small, cylindrical, lightweight form makes it possible for the animals to transport it around their environment
- The short fibres are safe for the animal and allow them to build soft nests just as in their natural habitat
- Cocoons are whitened without chlorine and are available with full certification

Product code:
CS3A01

Available in:
Case of 3600
Custom irradiated packs

Specifications:
51 x 51 x 8mm (Approx)

Product code:
COCOON

Available in:
Case of 6000

Specifications:
39 x 12mm (Approx) Per pellet
