

# Packaging Solutions from SDS

Being the largest supplier of research diets in Europe, SDS can tailor our packaging range to the industry's requirements. We offer the choice of polythene, vacuum, polylined and irradiated packaging, boxes and large capacity tote bags as well as our standard heavy gauge, multi-wall, 12.5kg paper bags.

Our extensive packaging range is part of our flexible service to present your diet requirements in the best way possible to suit your needs. SDS also specialise in "least packaging options" to minimise the quantity of material that has to be disposed of after use.

Paper as standard

White Plastic for fat coated diets

Polywoven for autoclaving

Heavy Duty Heat-sealed Plastic

Polylined for barriers

Double Polylined

Vacuum Packed  
2.5kg - 12.5kg

Bulk Box Delivery – Irradiated Diets

Bulk Bag Delivery

# Diet Solutions from SDS

Manufactured to the highest standards, SDS diets provide quality nutrition for research animals and meet exacting GLP requirements. The range is comprehensive, for all commonly used species, and in addition we prepare special diets for specific needs, i.e. high fat 'western' or compound added diets.

Our diet and packaging ranges combine to provide an outstanding choice for researchers all over the world.
