

felasa clasa

14th felasa congress 2019

Prague, Czech Republic
June 10–13, 2019

We hope to see you at FELASA Congress!

Join us on stand #A82-83 for launch of a new, improved and exiting SCANBUR product, at our workshop as well as on guided tours to our partners' stand!

WORKSHOP

Does Relative Humidity Affect Reproducibility of Research?

Ongoing studies show interesting preliminary data on rodent welfare and physiology when relative humidity is locally and accurately controlled at 55% compared to when relative humidity is controlled centrally, and thus fluctuating with the variable weather conditions.

We will present our findings and invite participants to share their experiences on the impact of - or the challenges of - obtaining controlled relative humidity in the rodent facility.

Topics include the effect of accurate relative humidity on:

- Breeding
- Aggression
- Embryo transfer
- Water intake

Save the date! This workshop (OWE12) will take place on Wednesday 12 June from 16:30-18:00 (Terrace 2A, 2nd floor).

Registration for workshops will open on the FELASA website during April 2019 <http://www.felasa2019.eu/scientific-workshops>

GUIDED TOURS TO OUR PARTNERS' STAND For Nordic customers

Join us for guided tours to our partners' stand and let us introduce you to latest news.

Monday 10 June 2019

13:00 Special Diets Services - Rodent diets

14:00 Avidity Edstrom - Automated rodent drinking systems

Tuesday 11 June 2019

11:00 Tecniplast & IWT - Rodent/aquatic housing & washing equipment

14:00 Matachana - Steam sterilizers

Wednesday 12 June 2019

10:00 Amira - Biodecontamination

11:00 Datesand - Rodent enrichment, bedding & nesting

14:00 Charles River - Research models
