Research Model Seminar

At times, information that can greatly improve research quality and help locate resources more quickly. We know this can be time consuming, particularly for researchers who are new to working with mice.

Key Differences Among B6 Substrains and the Research Impact

There's no such thing as a B6 mouse!

- »A brief historical perspective on the development of B6 inbred mice and different substrains
- »Recent publications highlighting significant physiological and behavioral differences among different B6 inbred mice
- »The significance of control selection and experimental design
- »Key tips for avoiding common B6 research mistakes

When: Wednesday 25th January 8:30-10:00 CEST. There will be fika before presentation

Presenter: Jutta Davidson, Research Models & Services Specialist, Charles River.

Location: Rudbecklaboratoriet, C11 Entre plan, Waldenströmsalen

Registration: Please email to Minttu-Maria Martikainen. mim@scanbur.com

Latest registration date: **20th January**

We hope to see you there!

Best regards,

Minttu-Maria Martikainen
