

# RESEARCH MODELS EVALUATION PROGRAM

## WHICH RESEARCH MODEL IS RIGHT FOR YOUR STUDY?

Selecting the appropriate research model for your study is critical for the reproducibility of your research and to ensure that no animal's life is wasted unnecessarily. The Charles River research model evaluation program allows you to assess the quality and compatibility of the research models before making a commitment. Whether you have a new research protocol, are conducting or fine-tuning a pilot study, or are simply exploring the opportunity to switch to a new research model, this program can help you make the right choice.

## PROGRAM BENEFITS:

- No cost: Select the research model you would like to evaluate, we provide at no cost
- Reduction: Determine if a research model fits your protocols and avoid using the wrong research model in large scale projects
- Quality assessment: Assess the quality of Charles River research models on your own terms
